Summary

Full Stack MERN Developer with 1+ years of experience building scalable web and mobile applications. Hands-On in React.js, React Native, Node.js, MongoDB with strong expertise in RESTful APIs, database design managing servers.

Technical Skills

Frontend and Languages: HTML, CSS, JavaScript, Bootstrap, Tailwind

Frameworks & Technologies: React.js, React Native, Node.js, Express.js, JWT, Redux, Prisma, Recharts, Chart.js, Cloudinary, Payment Gateways

Database: MongoDB, PostgreSQL

Tools & Platforms: Git, GitHub, Docker, Netlify, Render, PM2

Experience

MERN Stack Developer | Savitar Innovative Solutions Pvt Ltd

Dec 2024 - Oct 2025

- Enhanced admin dashboard with pagination for 2000+ records, plus data visualization, and interactive charts.
- Designed a scalable Node.js backend and optimized MongoDB queries, improving API performance by ~35%.
- Managed servers using PM2, monitoring and reviewing logs to ensure stable production performance.
- Tech:** JavaScript, React, Node.js, Express.js, MongoDB, Firebase, Cloudflare R2, Razorpay, Stripe

Frontend Developer | Exposys Data Labs | Internship

Jun 2024 - Jul 2024

- Build an internship registration mobile app that streamlined domain-based applications and centralized candidate management, supporting 500+ student registrations.
 - Migrated backend to Firebase Authentication and Cloud Firestore, enabling secure user login and real-time data storage.
 - Improved UI/UX using illustrations and vectors, improving user engagement and overall application usability by ~25%.
 - Tech:** JavaScript, React Native, Node.js, Firebase
-

Project

Finsight | Financial analytics dashboard | [Link](#)

- Created interactive dashboard with tabulated data and multi-chart visualizations using Recharts for financial analytics.
- Implemented advanced pdf parsing supporting multiple bank formats (for now BOB, CBI), with validation, security and structured data extraction pipeline, demonstrating microservice architecture knowledge.
- Developed modular backend with clean separation of concerns, rate-limiting, and effective error handling for scalability and performance.
- Tech:** React.js, Node.js, Postgresql, Prisma, Tailwind

LoopIn | Social media app | [Link](#)

- Developed a social media application featuring content posting, user mentions, trending hashtag, and profile management for 300+ users.
- Implemented Firebase OTP authentication, improving signup security and reducing unauthorized risk.
- Integrated cloud-based media storage, improving media upload efficiency and reducing server storage load.
- Tech:** React Native, Node.js, JWT, MongoDB, Firebase, Cloudinary

GIT Bus Card | College bus card system | [Link](#)

- Developed a digital college bus card portal that replaced physical bus cards, enabling students to access their bus card digitally.
 - Implemented payment history tracking and due-date alerts enabling admin to notify students with single click.
 - Designed an admin dashboard to manage students records, and efficiently handle 500+ students data.
 - Tech:** React.js, Node.js, JWT, MongoDB
-

Education

- B.E. Computer Engineering** | Gharda Institute of Technology | 2024 | 8.64 CGPA
 - HSC** | DBJ College, Chiplun | 2020 | 65.54%
 - SSC** | Suresh Damodar Gadre English Medium School, Chiplun | 2018 | 88.00%
-

Certification

- Amazon Academy Cloud Foundations | AWS | 2022 | [Link](#)
