Summary

MERN Stack Developer with 1 year of experience building scalable web and mobile applications. Hands-On in React.js, React Native, Node.js, MongoDB with strong expertise in RESTful APIs, database design and managing servers.

Technical Skills

Programming Languages: JavaScript (ES6+)

Frontend Technologies: React.js, React Native, Tailwind CSS

Backend Technologies: Node.js, Express.js, Prisma ORM

Database: MongoDB, PostgreSQL

Tools: Git, GitHub, Docker, Netlify, Render, PM2

Experience

MERN Stack Developer | Savitar Innovative Solutions Pvt Ltd

Dec 2024 - Oct 2025

- Built and enhanced a feature-rich admin dashboard with pagination for 2000+ records, interactive data visualization, and dynamic interactive charts using Chart.js - improving data accessibility for stakeholders.
- Maintained reusable React components, accelerating UI development across the project.
- Developed a scalable Node.js backend and optimized MongoDB queries, improving API performance by ~35%.
- Managed production servers using PM2, monitoring and reviewing logs to ensure application stability.
- Implemented secure payment webhook for Stripe and Razorpay and integrated Cloudflare R2 for managing media files.

React Native Developer | Exposys Data Labs | Internship

Jun 2024 - Jul 2024

- Built a React Native internship registration app supporting domain-based applications, used by 500+ students streamlining candidate management end-to-end.
 - Migrated legacy PHP backend to Node.js, integrating Firebase Authentication and Cloud Firestore for secure user authentication and real-time data management.
 - Optimized APIs and enhanced security, improving overall application performance and usability by ~25%.
-

Project

Finsight | Personalized financial analytics dashboard | [Link](#)

- Built a personalized financial analytics dashboard in React.js with multi-chart visualizations using Recharts, enabling users to analyze transactions intuitively.
- Engineered a modular, scalable Node.js backend using PostgreSQL and Prisma ORM, with structured architecture, optimized performance and centralized error handling.
- Implemented advanced pdf parsing supporting multiple bank formats (for now BOB, CBI), incorporating validation and secure data extraction pipeline, achieving ~90% transactions accuracy.

LoopIn | Social media app | [Link](#)

- Built a React Native social media app with content posting, user mentions, trending hashtag, and profile management.
- Developed a scalable Node.js backend implementing Firebase OTP authentication, supporting 300+ users with optimized performance and enhanced signup security.
- Integrated Cloudinary for media storage, improving media upload efficiency and reducing server storage load.

GIT Bus Card | College bus card system | [Link](#)

- Developed a React.js digital college bus card portal replacing physical bus cards, enabling students to access their bus card.
 - Designed and enhanced admin dashboard to manage students records, and efficiently handle 500+ students data.
 - Implemented payment history tracking and due-date alerts in Node.js backend, enabling automated email notifications to students with a single click.
-

Education

- **B.E. Computer Engineering** | Gharda Institute of Technology | 2024 | 76.78%
 - **HSC** | DBJ College, Chiplun | 2020 | 65.54%
 - **SSC** | Suresh Damodar Gadre English Medium School, Chiplun | 2018 | 88.00%
-

Certification

- Amazon Academy Cloud Foundations | AWS | [Link](#)
- Full Stack Web Development | Udemy | [Link](#)
