Summary

MERN Stack Developer building scalable web and mobile applications using React.js, React Native, Node.js, and MongoDB, with strong expertise in RESTful APIs, database design.

Technical Skills

Frontend and Languages: HTML, CSS, Bootstrap, Tailwind, JavaScript

Technologies/Frameworks: React.js, React Native, Node.js, Express.js, JWT, Redux Toolkit, Firebase, Razorpay, Stripe, Cloudflare, Cloudinary

Developer Tools: Git, GitHub, Postman, Netlify, Render, PM2 service, Figma

Database: MySQL, MongoDB, PostgreSQL

Experience

MERN Stack Developer | Savitar Innovative Solutions

Dec 2024 - Oct 2025

- Enhanced the Admin dashboard of a product-based platform by implementing pagination to efficiently handle 2000+ records along with dynamic data visualization, and interactive chart-based analytics.
- Architected a scalable Node.js backend for a mobile application and optimized MongoDB queries, improving API response performance by ~35% on large datasets.
- Developed and monitored server using PM2, ensuring stable production performance and improving uptime by ~10%.
- Implemented secure payment webhook and integrated cloud based media storage to manage 1000+ user generated files.
- Tech:** JavaScript, React, Node.js, Express.js, MongoDB, Firebase, Cloudflare R2, Razorpay, Stripe

Frontend Developer | Exposys Data Labs | Intern

Jun 2024 - Jul 2024

- Developed an internship registration mobile app that streamlined domain-based applications and centralized candidate management, supporting 300+ student registrations.
 - Replaced manual authentication with Firebase Authentication and Firestore for secure user login and real-time data storage.
 - Enhanced UI/UX using interactive illustrations and vector assets, improving user engagement and overall application usability by ~25%.
 - Tech:** JavaScript, React Native, Node.js, Firebase
-

Project

LoopIn | Social media app | [\[View\]](#)

- Developed a social media application featuring content posting, user mentions, trending hashtag, and profile management for 300+ users.
- Implemented Firebase OTP authentication, improving signup security and reducing unauthorized risk by ~40%.
- Integrated cloud-based media storage, improving media upload efficiency and reducing server storage load.
- Tech:** React Native, Node.js, JWT, MongoDB, Firebase, Cloudinary

Milk2Market | Dairy product mobile app | [\[View\]](#)

- Built the frontend for a dairy service mobile application aimed at helping small-scale organizations manage dairy product orders efficiently.
- Developed UI for one-time and subscription-based ordering models with customizable delivery date selection.
- Implemented responsive and user-friendly interfaces, improving usability and order management experience.
- Tech:** React Native, Node.js

GIT Bus Card | bus card management system | [\[Visit\]](#)

- Developed a digital college bus card portal that replaced physical bus cards, enabling students to access their bus card digitally.
 - Implemented payment history tracking and due-date alerts enabling admin to notify students with single click.
 - Designed an admin dashboard to manage students records, and efficiently handle 200+ students data.
 - Tech:** React.js, Node.js, JWT, MongoDB
-

Education

- B.E. Computer Engineering** | Gharda Institute of Technology | 2024 | 8.64 CGPA
- HSC** | DBJ College, Chiplun | 2020 | 65.54%
- SSC** | Suresh Damodar Gadre English Medium School, Chiplun | 2018 | 88.00%
